Competitive Wages, Solid Group Benefits and Flex Spending Account, RRSP Matching, Referral Bonuses, Apprenticeships and Course Reimbursements.

Our Core Values:

No One Gets Hurt ~ We Are Like a Family ~ Do What's Right ~ Do What You Say ~ It's Fun to Win ~ Finding a Better Way

We are currently looking for a full-time **Field Service Generator Technician** to join our **Calgary Office Team**. We are looking for someone who is ready for the opportunity to grow with the company and the industry.

Primary Job Functions:

Diesel and Natural gas engine and generator preventative maintenance, load testing and troubleshooting
Perform emergency field service, field repairs, troubleshooting, etc. on customer's new and used equipment
Conduct startups, new product commissioning, calibrations and load bank tests on-site as required
Test, measure, and verify electrical and mechanical component operations, this may include energized components
Develop productive customer relations and ensure prompt and efficient attention to the customer needs
Communicate unresolved issues to the Field Service Coordinator / Supervisor
Complete required high-quality documentation, such as service worksheets, timesheets, warranty claims, quality documents
Maintain service vehicle and tools for cleanliness and proper operation
Maintain driver logs
Available for 24 hr off duty on-call rotation and off-duty customer phone support
Mentor, develop and support junior staff and apprentices for future growth and development
All other duties as required

Qualifications and Education requirements:

Must have:

Minimum 3 years of experience working on 30 kW to 3 MW generators
Journey person License or in 3rd year apprenticeship as a HET, Millwright, Automotive, or Electrician
Valid driver's license, clean drivers abstract and experience operating a field service truck

Required Competencies:

Emergency Stand-by Generator experience
Excellent troubleshooting and decision-making skills
Able to perform troubleshooting, repairs and preventative maintenance on stationary natural gas and diesel engines and generators, this includes changing oil and filters, changing coolant and water pumps, setting valves and injectors
Able to connect and operate load banks up to 3 MW/600 Volts

Proven mechanical and electrical aptitude combined with working knowledge of engine and generator control panels
Strong ability to work as a team and with minimal supervision
Safety and quality minded attitude
Must be able to contend with the demanding schedule of field service work and “on-call” rotation
Able to read and understand drawings, service manuals, schematics, and diagnostic systems
Above average computer skills; emails, Microsoft Word and Excel, engine software, etc.
A high level of initiative and attention to detail
Exceptional communication and organization skills
Strong ability and willingness to learn
Must have standard trade tools
Available for, and legally able to, travel internationally
Commitment to Collicutt Core Purpose and Core Values
