

## EQUIPMENT PRESERVATION TECHNICIAN

Collicutt Energy Services is a solutions-oriented, engine company. We specialize in custom manufacturing, repair, overhaul, and maintenance for all engine brands across diverse industries - consistently raising the bar for customer satisfaction. Our company culture emphasizes safety, respect and continuous learning, fostering an environment where employees can thrive professionally and personally. As a growing, privately-owned organization, we offer exciting opportunities for career advancement and the chance to contribute to cutting-edge energy solutions. Join Collicutt and be part of a collaborative team that values community involvement and shared success in the ever-evolving energy sector

We are currently seeking a mechanically inclined **Equipment Preservation Technician** to support our **Red Deer/Rimbey Operations Team**. This hands-on role requires strong mechanical skills, attention to detail, and a proactive commitment to safety while working with rotating equipment, engines, and associate systems.

In this role, you will also be responsible for:

- Execute preservation procedures on idle and stored engines and rotating equipment, including:
  - Application of protective coatings,
  - System flushing & sealing
  - Moisture and corrosion prevention.
- Performing mechanical inspections, diagnostics, and preventative maintenance activities
- Troubleshooting mechanical issues, contributing to root cause analyses.
- Supporting engine overhauls and rebuilds, ensuring re-preservation is completed to protocols.
- Collaborating with the Parts and Operations teams to maintain efficient and safe workflows aligned with industry and OEM standards.

### Qualifications and Skills

#### **Required**

- Grade 12 Diploma
- **Minimum 3 years of experience** working with engines or rotating equipment (preferably in the oil and gas industry).
- Solid understanding of **diesel and/or natural gas** engines, compressors, pumps, and gear systems.
- Practical knowledge of:
  - mechanical preservation techniques
  - corrosion prevention methods,
  - system flushing and sealing practices
- Able to read and interpret technical manuals, mechanical drawings, and work orders.
- Competency with maintenance tracking systems and basic computer skills.

#### **Preferred**

- Background in equipment inventory or parts coordination
- Familiarity with Original Equipment Manufacturer (OEM) maintenance procedures
- Strong communication and mechanical documentation skills
- Self-motivated, with the ability to work independently and as part of a team setting.

**Working Conditions**

- Primarily shop and field-based role.
- Exposure to loud environments, heavy equipment, and varying weather conditions.

As a team member at Collicutt Energy Services, you can enjoy:

- Competitive Wages
- Solid Group Benefits
- RRSP Matching
- Referral Bonuses
- Apprenticeship & Course Reimbursements

This is a hands on, field-based opportunity to work with mechanical systems critical to oil and gas operations. If you take pride in your wrench-turning expertise and want to contribute to equipment longevity and performance, we want to hear from you. Please submit your resume to [hr@collicutt.com](mailto:hr@collicutt.com) with **Preservation & Maintenance Technician** in the subject line.
